# CBD, PROPERTIES AND BENEFITS

## *Outstanding dermocosmetic properties*

Currently used overseas by millions of consumers, *CBD* has taken center stage in the dermocosmetic scene thanks to its properties, which prevent and counter many pathological conditions and skin diseases.

According to some scientific studies, *CBD* has an antioxidant power superior to that of vitamin C and vitamin E [1], thus becoming a fundamental ally of the skin in the prevention of aging.

Other studies show that it is able to control the correct and balanced proliferation, differentiation and survival of skin cells. The disruption of this delicate balance could in fact facilitate the development of multiple pathologies and skin diseases such as eczema, dermatitis or psoriasis [2].

*CBD* also has an important sebum-regulating function and is optimal for all those skin imperfections that can sometimes culminate in specific problems such as acne [3-4].

# SAFE AND HIGH QUALITY INGREDIENTS

---

## *Highest quality and safety*

The 150 hectares we cultivate between *Abruzzo* and *Emilia Romagna* are planted exclusively with certified seeds, we let the hemp plants grow in accordance with their natural cycle of development, *using no chemicals or pesticides*.

We supervise our supply chain from seeds to flowers, monitoring each stage of production with care and passion. Each ingredient comes from a synergetic relationship with nature. We cultivate according to the principles of environmental sustainability and good agricultural practices *GACP*, respecting our territory, the true star of our formulations.

Enecta Farm cosmetic line products are made in compliance with *GMP* cosmetic standards (*UNI EN ISO 22716*), which ensure, through the control of processes, the highest quality and safety. In addition, the *CPNP* notification, as required by law, allows the free distribution throughout Europe.

The formulations do not contain parabens or silicones and are *tested on the 5 main heavy metals* (Cadmium, Lead, Chromium, Mercury and Nickel). Finally, to meet the needs of the most attentive consumers, the products are laboratory *tested on the most sensitive skin*.
